Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

- I. Claims 1-14, drawn to attaching a recording medium with added information to a product, classified in class 705, subclass 14.
- II. Claims 15-16, drawn to accumulating and tabulating customer information data, classified in class 707, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II, are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention group I has separate utility such as attaching a recording medium to a product. This separate use distinguishes the invention of group I from group II, since the feature of attaching the recording medium to a product is not limitation of those independently claimed inventions. Therefore the invention of group I is a separately useable subcombination. See MPEP § 806.05(d).

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process/method as claimed can be practiced by another materially different apparatus or by hand because the independently claimed process/method is not limited to the independently claimed apparatus features of customer input processing device, a data processing means, display means, database control means and data tabulating and analyzing means. Because these inventions are distinct for

the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
